Welcome To Our World

It's all about the idea. The spark. The piece of excitement that draws people in. We produce sparks by working hard, hammering out ideas fanatically to create something special. Passionately exploring all the possibilities, we know everything starts with a spark. So there you go. No fluff. No flowery nonsense. Just honest hard work. Raise your hand if you already knew this from the cover.

We embrace concepts others will not, and bring those concepts to our clients with the end result being multi-pronged campaigns that incorporate brand strategy, creativity, technology, and analytics that make past strategies look downright boring. With more than a decade of experience, we have helped our clients all over the world to create eye-catching and head-turning creative solutions.

**We look forward
to working with
you.**

We work with your marketing team to create the right message for your brand, and help you select the most effective vehicles to distribute that message to the industry. We work directly with ASI, PPAI, Sage, Distributor Central, and the rest to ensure you're not wasting money with your media spend. Do you know what kind of ROI you're getting from your marketing spend? We do.

Welcome to our world. It's not at all like the world you used to, but make yourself at home. Don't shy away from what's behind the open door, it's really not terrifying, we promise.

Give yourself a chance to play in our sandbox. We have a feeling you're going to find it liberating, and habit forming.

Word From Our Principal

Eight Legged Media opened its doors in June 2007 with an idea that we could do something different. Electronic marketers typically listened to the wants and needs of their clients, but what if in addition to that someone actually listened to the wants and needs of the client's clients?

With that in mind, we entered the promotional products industry to test our theories, and you know what? They worked. We found that by just listening to, and making adjustments based on, distributor recommendations, they became much more responsive to digital forms of advertising.

We take great pleasure in creating new tools that expand our clients' reach, brand identity and market share, but our driving force is to utilize new ideas in creative ways. Creativity is our passion.

It's a good thing we like sharing.

Eight Legged Media

Getting Noticed. It's what we're known for.

Who We Are

Eight Legged Media started with the mantra, "There has to be a better way." In 2007, that meant a better way to manage email marketing so it could be the powerhouse marketing tool it once was. In 2015, we strive to bring those same high standards to marketing efforts across the promotional products industry. We want to hold vendors accountable to their results, and drive engagement through unique, eye catching content.

We deliver marketing solutions that transform brands and grow businesses. We look forward to joining you on your journey whether you need a tour guide for the day, or a sherpa for the long haul.

2007

We expected more from email marketing. It was over used, over priced, and boring. We heard those complaints, and changed the game to make email work again.

2009

We introduced ePages, our proprietary electronic catalog platform. We made it free to use, and added a share on social media tool that has become standard with our competitors.

2012

We became more than just email. We began the process of becoming a marketing agency for the promotional products industry. We introduced design, and editorial services.

2015

We've been enhancing our tools, and our skill sets. We've added key personnel and formed partnerships that have transformed us into the industry's marketing leader.

What We Do

We build you a custom strategy based on your business needs and brand objectives. Then we fuel it with writing, graphics and videos from our in-house creative departments.

All of our marketing and creative teams work together to keep your goals top priority, and your content cohesive – which we'll tell you is a core ingredient to success.

We believe in the power of experiences. Regardless of their form, great experiences are capable of connecting people and instilling in them a truly unforgettable feeling that all of us can begin creating, right here, today. Simply put, experiences build relationships, relationships build brands.

Questioning

Our unique process starts off with the dig. It's all about us really getting under the skin of your business so that we understand it as well as you. We have a set of questions specifically designed to collect precisely the right information. This means we can efficiently generate an accurate brief, and start work on your project, fully understanding your requirements.

Planning

Often overlooked or seen as a waste of time, it is the most important aspect of any marketing program. It builds on your brand's message, determines strategy, announces your target audience, and spells out what your annual spend will be. Why not let us do the planning for you? We have years of experience, and know how to get it done the right way.

Buying

You have money to spend, but either don't know where to spend it, or have always spent it the same way every single year. You might not remember who your ASI rep is. That's okay, we can find out and make sure you're getting your money's worth. Let's make sure every dollar is actually making you money by staying on top of the analytics.

Development

This is where so much important work is done. We use the brief and our understanding to work, and work, and work. We explore all the possibilities, we generate ideas and then develop them into solutions. We use our work / play ethos to look at your brief from different angles, to make sure we are providing you with the right solution.

Discussion

An essential part of our process is 'you.' We have found that direct communication between you and our designers is the best way to achieve results. After we have developed our ideas we encourage an open and honest discussion. We'll discuss all the design options with you; the good points, the bad, and never duck the tough decisions.
