We do have the ability to print CMYK on top of molded PVC so that we can accommodate designs with these elements, but there will be additional costs that can be significant, especially at low quantity. On average, the increase in unit cost is about 15%, and there will be an additional set-up of \$125.00 Net. However, since the costs are based on the specific size, shape, and coverage area of the printing, we cannot give a firm price without submitted artwork. We apologize for any inconvenience.
