REPRODUCTION OF ART

Due to the textures and surfaces of products such as pennants and foam, it may be difficult to reproduce art with extremely sharp detail, fine lines or halftones. Generally, darker inks reproduce better on lighter surfaces or substrates. Please note: due to the taper of stadium cups and megaphones, some artwork may appear distorted when printed.

PRINTING METHODS:

SCREEN PRINTING

The direct imprinting of a design or copy onto the surface of a product. Ink is pressed through an image tension nylon mesh, leaving a paint-like appearance. Sharper imprint than Pad Printing but requires a relatively flat surface without obstructions. Artwork should be supplied in a vector format or be simple black and white images. For files that contain raster images, art charges will apply. Halftones are to be no more than 55 line screen at 100% with 25%-75% shading.

SCREEN PRINTING SET-UP CHARGE is \$45.00 (V) per color/per side
SCREEN PRINTING EXACT / REORDER SET-UP CHARGE is \$20.00 (V) per color/per side.

PAD PRINTING:

An inked image is transferred from a laser etched plate to a thin, soft, silicone pad, which is then pressed against the part to transfer the image to the part. The pad can wrap itself as much as 150° around a small part and produces excellent ink coverage. Artwork should be supplied in a vector format or be simple black and white images. For files that contain raster images, art charges will apply. Halftones are to be no more than 55 line screen at 100% with 25%-75% shading.

PAD PRINTING SET-UP CHARGE is \$45.00 (V) per color/per side
PAD PRINTING EXACT REORDER SET-UP CHARGE is \$20.00 (V) per color/per side.

DIGITAL 4-COLOR PROCESS

Process that recreates images using patterns of tiny dots of CMYK ink. Pantone or PMS colors can be used as a reference for color matching but may not be reproduced precisely. If a specific color is required, please request color swatch samples. If Pantone colors are used in artwork, they will be converted to CMYK colors and matched as closely as possible. Some PMS colors fall outside the achievable CMYK gamut range. Metallic and neon colors cannot be printed in 4 color process. Artwork can be in either vector or raster images. Artwork supplied in raster image format must be 300dpi at size or pixelation may occur. Text print sizes on all digital items can be no smaller than 10pt font. Samples may be requested of font smaller than 12 pt.

DIGITAL PRINTING SET-UP CHARGE is \$50.00 (V)
DIGITAL REORDER SET-UP CHARGE is \$25.00 (V)

Note: Artwork will be kept on file for two years from the original order. After two years, a new set-up fee will be charged.
