Wheatgrass
 Wheatgrass is an easy and very healthy plant to grow. Soak wheatgrass seeds in water for 8-12 hours. Drain water, rinse seeds thoroughly and drain seeds again. Sprout seeds evenly on thoroughly moistened soil. Select a low-light, room temperature location. Water seeds lightly once or twice a day to keep seeds moist. Once grass is 1-2 inches tall, move to a well lit location and keep moist by watering daily. Once wheatgrass is 7-8 inches tall, harvest the grass by cutting 1-2 cm above the soil. Store cut wheatgrass in a dry, airtight container. It is best to juice the wheatgrass for the most nutritional benefits.

SEEDBALLZ®

Seed Ballz are a unique and special success story. Inspired by the teachings of author Masanobu Fukuoka and his approach to natural farming, a special blend of red clay, rich humus and a whole package of flower seeds were used in their creation.

A partnership was then formed with organizations assisting the developmentally disabled to hand-roll this unique garden product in the U.S.A. The result of these shared efforts is a new way to grow clusters of flowers and herbs while creating meaningful, therapeutic work for valuable members of our community. Seed Ballz are perfect for outdoor patio pots and garden beds. Plant in memory and honor to celebrate life and survivorship.

Seed Options: Hummingbird/Butterfly Mix, Forget-Me-Not, Edible Flower Mix, Seeds of Hope Mix, Bee Mix, Basil or Cilantro. The Seeds of Hope Mix produces clusters of pink flowers.
