

ATLANTIS®

infinite headwear

2021 News

Atlantis is a brand of the Italian company Master Italia, specialized in designing and manufacturing high-quality headwear.

2021 CONCEPT

Inspired by a slow fashion concept, the **Atlantis Collection 2021** merges **essential design** with the **latest in sustainable fabric innovation**.

We strongly believe in an eco-friendly garment life cycle. We carefully chose recycled fabrics and low-impact manufacturing processes and introduced **an almost entirely sustainable collection** made of popular lines and shapes.

We intentionally left behind flashy models and eccentric details to focus once again on green and smart fibre production, making them available to everyone. To highlight the **contemporary look**, our hats and beanies mix an old-school style together with the modern idea of using raw materials to create something **timeless** and forever welcome in the wardrobe.

FOLLOW OUR JOURNEY TO SUSTAINABLE HEADWEAR

We aim to reduce our environmental impact by embarking on a new journey towards a more sustainable business model.

2018 the beginning of our path, by introducing first Oeko-Tex products.

2019 launch of the *Green Collection* in recycled polyester, organic and recycled cotton.

2020 release of the first *Sustainability Report*, a great opportunity to spread the culture of sustainability and our social and environmental impact.

Follow our journey to sustainable headwear and accompany us along this path through our products and projects for a better future.

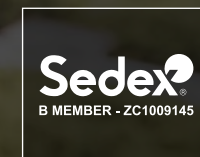

CERTIFICATES

Our comprehensive commitment to the adoption of sustainable processes and methods.

Atlantis is proudly certified by

Atlantis cares about safety and quality

ATLANTIS TECHNOLOGY LAB

Our high-end fabrics, cutting-edge design concepts and functional technology are what set us apart.

Take a look at the technologies applied to the new 2021 styles

RECYCLED POLYESTER

Fabric made from polymers obtained recycling plastic bottles.

OEKO-TEX®

Certified fabrics that respect human and ecological standards.

DRY-TECH

Sweatband in polyester and elastane with antibacterial properties, for a better absorbency and perspiration.

WATER RESISTANT

This technology keeps you dry in any wet weather situation.

MECHANICAL STRETCH

Fabric with stretch properties that makes it elastic not thanks to elastane but to a mechanical stretch action in the weaving.

REFLECTIVE YARN

Special fiber that reflects the light creating a shiny effect

CATIONIC FABRIC

Special polyester fabric with a two-tone color effect, obtained thanks to a cationic reaction during the dyeing process.

POLYLANA®

Polylana fibers are a sustainable choice, with a wool-like hand feel and a significant low impact in the environment.

TECHNOLOGIES & MATERIALS

In Atlantis we are always looking for the best wearable technology, not only in materials but also in **innovative solutions and processes** that encourage ourselves to think ahead and think sustainable.

We are constantly evaluating new fabrics and re-evaluating existing ones in our quest to make the best product.

BELIEVE IN BETTER

Polylana® unlocks new potential in fiber creation with reduced environmental impact and enhanced performance capabilities.

Polylana® is a patented staple fiber made from a mixture of virgin and recycled materials to create an innovative fiber with characteristics similar to acrylic or wool fiber. This proprietary blend allows PolyLana® thread to be dyed at a low temperature, and gives the yarn, when knitted, a unique loft and feel.

- Reduces** environmental impact.
- Reduces** water consumption.
- Reduces** energy emission during dyeing.

POLYLANA®

BE PURE

Atlantis introduces Pure, the first PolyLana® beanie that represents a low-impact alternative to 100% acrylic fiber with less energy, water, waste, CO2 and microfiber release. Not just different, but better.

Production impact per 1 kg. undyed fabric

Material	Energy (MJ)	Water (l)	Waste (kg)	GhG (kg CO2)	Fiber Release
Polylana	90.7	27.2	0.3	13.6	82,672
Acrylic	379.0	182.0	1.2	16.9	121,465

76% Less Energy

85% Less Water

76% Less Waste

19% Less CO2

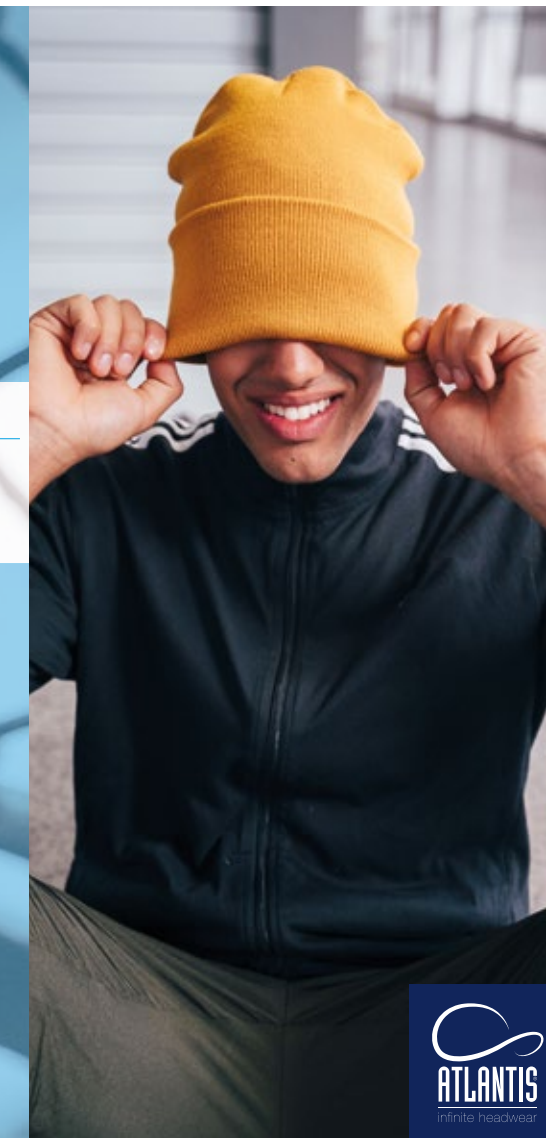

32% Less Fiber Release

Water savings per product
60% PolyLana® / 40% Acrylic Yarn VS 100% Acrylic

One beanie saves 5 liters of water

infinite headwear

DIAMOND SHAPE STICKERS

The ID cards of our hats.

Placed directly on the visors, stickers express **the personality of the Collection** and help to recognize, in an immediate and intuitive way, **the materials and the innovative features of the product.**

RECYCLED POLYESTER

Recycled polyester is made from polymers obtained by recycling plastic bottles.

WATER RESISTANT

A durable outer fabric treatment provides you additional protection of water repellency.

MECHANICAL STRETCH

A fabric that has inner stretch properties, without using spandex or other stretch yarns in the weaving process.
