WAITER'S CORKSCREW

**BIGGEST
INNOVATION**
IN WAITER'S CORKSCREWS
IN 30 YEARS!

**THE ROTO HANDLE
SOMMELIER'S NEW BEST FRIEND!**

**Strong Aluminum Body,
Other Parts Are Stainless Steel.**

3115 Cork Boss™ Waiter's Corkscrew

Here's the latest innovation in a waiter's corkscrew: Cork Boss™. It makes insertion into the cork very fast and easy. It quickly removes the cork from the spiral afterwards. The most time consuming exercise with a waiter-type corkscrew is inserting the spiral into the cork. Now it's rapid and easy. Strong aluminum body, other parts are stainless steel. Patent Pending. 5-3/8" long, 5/8" wide.
Pkg. Code: BXR Imprint area: 2" X 5/16". Laser Engraved.

IMPORTANT PHYSICAL ADVANTAGE OF THE CORK BOSS™

**Perfect for individuals who have
limited strength with their hands.**

For waiters or sommeliers opening 20 to 40 bottles in an evening. Cork Boss™ transfers the twisting torque of the wrist away to the operator's hand, arm and shoulder. This can alleviate wrist pain, inflammation and possibly even carpal tunnel syndrome.

**The Roto handle's easy-turn
metal sleeve makes it effortless
to insert the spiral into the cork.**

**Avoid Wrist-Pain and
possibly even Carpal Tunnel!**

Instructions on how to use:

- Step 1.** Insert one-turn of the spiral into cork. Lift Roto handle.
- Step 2.** Turn the Cork Boss™ clockwise using only the Roto handle until the spiral is inserted into the cork. Leaving a half turn exposed of the spiral.
- Step 3.** Fold down the Roto handle and extract the cork with the two-step lever.
- Step 4.** When finished, lift up the Roto handle, grip the cork in your hand and spin it off the spiral.

 Two-Prong Cork Extractor

Ahh Super!™ Two-Prong Cork Extractors

This category addresses particularly difficult corks as well as perfectly normal corks. Extraction is very easy. The “difficult” corks are usually older corks that are showing signs of crumbling. To remove cork: Ease the twin blades down on both sides of the cork by rocking the handle back and forth until the blades are all the way down. Twist clockwise and pull upward to remove the cork. Some key features:

- Full extraction or partial is possible
- You can re-cork the bottle
- Cap lifter located on top of the metal handle units

ElectroParagon™

PROFESSIONAL ELECTRONIC UNCORKING MACHINE

This state-of-the-art professional Electronic Uncorking Unit extracts 500 corks an hour.

Great For:

- Wine Bottling Lines
- Winery Laboratories
- Hotels
- Restaurants
- Tasting Rooms
- Banquet Rooms

The ElectroParagon replaces its predecessor, Electropull and Electropull Focus. Electropull was a successful line for more than a decade until the producer retired and closed production. (We will continue to furnish OEM component parts and service for existing ElectroPull units.)

THE NEW ELECTROPARAGON™

ElectroParagon™ is the result of years of research and engineering. It sells at a better price than Electropull and has a simpler modular construction. The line consists of three (3) options:

4012 ElectroParagon™ Electric Uncorking Machine (Wall Mount)

ElectroParagon is a Heavy-Duty Electric Uncorking Machine that can extract 500 corks an hour, with little effort reducing labor costs dramatically!! This is the wall-mount unit as shown in Figure 1. This unit has wall mounting hardware included. It stands 21-3/4" H, 5-1/2" wide and 7-1/2" deep. The unit weighs 16 lbs. Pkg. Code: BX

4013 Table Stand Base For ElectroParagon™ Electric Uncorking Machine (see page 63).

The 4012 unit mounts on this stand to allow for a counter or tabletop installation. Hardware is included for mounting the wall-mount unit on top. It stands 17-1/2" H, and 9-1/2" wide and 10-5/8" at the base. The unit weighs 14 lbs. Pkg. Code: BX

4014SET ElectroParagon™ Electric Uncorking Machine With Table Stand Base (Stand Included In Price)

This combines the 4012 ElectroParagon™ and the 4013 ElectroParagon™ Table Stand with a savings in price over buying each separately. Shown in Figure 2. The combined unit stands 38" H and weighs 29 lbs. Ships in two cartons. Brief assembly required. Pkg. Code: BX

To Operate :

Place a bottle, with capsule removed, into the cradle. This automatically triggers the downward movement of the spiral into the cork. It then continues to extract the cork (remove the bottle at this time). The spiral then goes up and expels the cork and the cork falls from the machine.

New Improvements Over Electropull Focus:

1. Convenient Modular Component System
2. Handle included on top
3. More powerful motor
4. Advanced Electronic Components
5. Lower price

1210 CAP-CUT Professional Wall-Mount Wine Bottle Capsule Cutter - Made in Spain

Innovative capsule cutting system. High impact plastic casing. Back wall-mount part separates from the body and mounts to the wall (screws, wall plugs and washers included). Insert bottle into the U-shaped white bracket. Press the moveable part twice; three cutting wheels remove the foil from the bottle. 4-5/8" deep (from wall), 4-3/8" wide, 2-1/4" high. Pkg. Code BX.

Imprint area: 1-1/4" X 1-1/4". Screen/Pad Print.

Patents in the U.S.A. and other countries.

4016 ElectroParagon™ Cork-Catcher Bag™ For 4012 And 4019

This is an indispensable accessory when you need to remove a lot of corks in a short period of time with the ElectroParagon™. The efficient Cork-Catcher Bag consists of two parts: (1) the top apron which attaches to the ElectroParagon™ unit and (2) the bag itself. The bag is attached to the upper apron with snaps (behind the red band). When the bag is full, a pull string cloth top casing comes up over the corks to seal them in the bag. The detached bag can then be removed without the risk of corks spilling everywhere. The bag will hold up to 600 corks. The unit utilizes laminated PVC and polyester materials in its construction. Measurements: top apron, 11-1/2" x 20"; bag itself, 10-1/4" x 7-7/8" x 22"; overall total unit height, 39-3/4".

4019 ElectroPull II™ Professional Uncorking Machine

This heavy-duty work horse of a machine is covered by six different U.S. patents. Originally designed for use in a winery by an Italian winemaker, this machine removes corks quickly and effortlessly. This machine is designed to remove corks completely or partially for later consumption (ex. banquet events). Digital Bottle Counter. Unit measures: 39-3/4" tall, 7-1/4" wide and 7" deep. The unit weighs 25.4 lbs. Includes a tool box, with two spare spirals and foil cutter built into the base. Pkg. Code: BX

One winery-packaging specialist in California comments.

"In just two months, we uncorked over 50,000 bottles using the ElectroPull® and its performance was flawless. We also used it in our lab when performing microanalysis and opened bottles with all types of corks. Not only is the ElectroPull® fast and efficient, but I believe it will reduce injuries associated with uncorking motions.

It definitely has a place in any wine bottling department."

It has a unique 2.7 mm hardened stainless steel open spiral. This worm has no difficulty with hard agglomerate or plastic corks. Machine will shut down if hard object (other than wine bottle) is placed in cradle.

Re-starts in 30 seconds.

PROFESSIONAL ELECTRONIC UNCORKING MACHINES

new
4019

The latest in an electric professional uncorking machine.

Sleek new design. Comes with a built-in stand.

Extracts 500 Corks per hour.

Exclusive Partial Extraction Feature!

The function is much the same as the ElectroParagon™ with certain added features. This newly designed unit integrates features from the original ElectroPull® plus more. Those added features are:

- **Partial Extraction:** A sliding up-and-down gauge allows at "Min" the extracting of just 1" of the cork from the bottle. At the Medium (half-way point) adjustment only 1-1/2" of the cork is extracted. At the bottom of the gauge ("Max") complete extraction takes place. These partial extractions are great for pre-opening many bottles in advance for large dinner parties or gatherings without exposing the wine to air.
- **Bottle Counter:** Enables counting bottles opened on a digital screen. Easily resets when needed.
- **Worm Replacement Kit:** All the tools needed for replacing the worm are located in a compartment in the lower left of the machine near the base. The kit contains two (2) spare replacement spirals, two (large and small) Allen wrenches and a spare fuse.
- **Foil Cutter:** A foil cutter is located in a compartment in the lower right of the machine near the base.
- **Machine Specifications:** Measures: 39-3/4" tall, 7-1/4" wide, 7" deep, weight: 25.4 lbs. 24V DC upper and lower motor. Power: 200W. Electrical Range: 110V-240V AC, 50-60Hz.

DECANTUS™

A UNIQUE, BY-THE-GLASS
WINE DECANTING SYSTEM

Get greater Value and
Enjoyment from your next
bottle of wine with DECANTUS.™

Wine needs to react with air to
reveal its fullest flavor and bouquet

The DECANTUS™ utilizes the Bernoulli (a Swiss scientist) effect where the reduced pressure of a stream of fluid (wine) draws an air flow through diagonal thin tubes inside the DECANTUS™. The wider opening on top and larger liquid capacity of the top reservoir bowl makes pouring into DECANTUS™ much easier than with the Vinturi. Wine travels faster through the DECANTUS™ without a whirlpool effect, because of the vertical planar insert. Reduces free sulphites an average of 56%* (see www.decantus.net). The "froth" from DECANTUS™ has finer bubbles giving smoother aeration than any other aerator on the market. Made with FDA approved materials.

Preserves Wine Much Longer Than Other Preservers!

7840 AntiOx® Deluxe Carbon Filter Wine Preserving Stopper

This consists of a metal ring around the circumference to be turned to the day the wine was closed (31 day indications). For optimal performance the bottle should be stored in an upright position. Stands 1-7/8" H x 1-1/2" dia. Pkg. Code: BXR (with hanger tab).

**6285 Aromabar, Premium Edition (60 Set)**

The diversity of wine aromas is fascinating. They range from delicate floral and fruity scents to strong animal aromas and sometimes even chemical smells. The origins of these aromas are different. Most stem from the grape variety itself, others occur during wine making, fermentation and the maturing of the wines.

“Aromabar is an ‘incredibly’ valuable tool for the wine expert.”
-Bernhard Kirsten / Mosel, one of the Top 100 winemakers in Germany

The 60 aromas, each in a screw cap vial, are marked with numbers corresponding to the listing in each manual. Those categories are:

- White Wine. (12) Fruity aromas predominate in white wine.
- Red Wine. (12) Contains a wide range of aromas.
- Oaked Wine. (12) Wines are influenced when aged in oak barrels
- Wine Faults. (12) These are the cause of off-aromas.
- Specialties. (12) Fascinating aromas in certain wines.

Each category is separated into (5) boxes with its own manual. The remaining box contains a master manual for all categories. The wooden box comes with a removable wood lid to easily display the entire collection at once. A wide elastic band keeps it closed. Box measures 23-3/8" x 13-1/8" x 2-1/2" high. Pkg. Code: BX. Imprint 3" x 2". Laser. *ColorBlast* Imprint area on box: 4" X 4".

“The essences in Aromabar are very accurate.”

Recommended for use with Frammara's selection of Essences Collections, this tool will help to train your palate to the pleasure of the complex odors and aromas that create the character of wines. For each "Secondary Aroma" category, wine examples showing that particular characteristic are listed to the right. Laminated. 5-3/16" x 5-3/4" folded in thirds; 5-3/16" x 17-1/8" unfolded.  Laser Engravable
 Leatherette

A New Line of Laser Engravable Leatherette Products

Laser Engravable Leatherette has the look and feel of genuine leather but at a fraction of the cost. This synthetic leather material, with its high quality and rich texture, has taken the imprinting industry by storm. It engraves beautifully. Black color material lasers out to a silver imprint. Rawhide color material lasers out to a black imprint. Result: a clear and elegant look. Cleaning: It is water resistant and easy to clean with water and soap. It will leave no water spots. Alcohol works well to remove pen marks.

Some comments made about this material: *"Even though it's synthetic leather it looks and feels like leather." "It has a high perceived value. It looks great and lasers great."*

Terra Cotta has been widely used for centuries. Terra Cotta means "baked earth" in Italian. It is clay based, and in this case, fired and unglazed ceramic which remains porous when finished. When soaked with water the wine cooler maintains the temperature of pre-chilled wine. The natural cooling of wet Terra Cotta occurs when the natural evaporation of pores takes heat with it.

7870 Take Home™ Wine Bottle Bag*

This plastic wine bottle bag satisfies the needs in many states, without violating open container laws*, for a patron at a restaurant who wants to take home an unfinished bottle of wine. Ask for a Modularack® Catalog

All Modularack® wine racks are made in Australia for a very good reason. It's the strong, hard, high-density wood from plantation-grown Australian Radiata Pine

that makes these racks very special.

Radiata pine originates from the California Monterey pine tree (*Pinus radiata*). The story is quite paradoxical. Monterey pine has an extremely limited natural habitat in only three localities on the California central coast, largely on the Monterey Peninsula. In its native habitat it has little economic importance. Conversely, this same tree species

has been planted more abundantly throughout the world than any other American tree where it has great economic importance. Therein lies the paradox.

Monterey pine has been grandly successful in Australia, where the Monterey legacy wine rack wood is grown and the racks are produced. This modern Monterey pine, called Radiata pine in Australia (its Latin name), has gone through selective breeding to produce superior trees with very straight, tall trunks. The result: a hard, high-density, strong wood.

All Modularack™ products are made from FSC* certified timber.

*FSC - Forest Stewardship Council promotes worldwide standards for forest management.
