How it all started

The ReturnMe concept was born in 2003. ReturnMe's founder, Suhail Niazi, moved into his new home and Pasha, his cute white Persian cat went missing and didn't return home. Pasha's pet tag had Suhail's old contact number which was no longer in service since he moved and had to change his landline phone number. So even if someone found Pasha, they had no number to reach him at! Suhail wondered, "What if the phone number on the tag went to a number which would never change and be answered by someone 24/7"? In hopes to resolve this problem for himself and many others, Suhail launched ReturnMe a few years later.

Luckily, after posting dozens of posters around the block, Pasha was found a few days later and was happy to be back home.

What clients are saying about ReturnMe

Working with the ReturnMe team has proven to be an exceptional experience, not only do they do a great job creating and presenting options that meet your needs they also manage the program very efficiently going so far as to provide their own CSRs to assist in training or on floor experiences. The quality of the product and the value proposition is what really impressed me. When you are looking to manage budgets but provide consumers with high perceived value being able to guarantee piece of mind that should they lose their keys or phone they will get in returned is a great tool in building consumer confidence. And because this product is branded for your company it truly gives the consumer the impression it was your company that looked after them. We have used Return me for the past 3 years on various projects and have been extremely pleased with the both the products and the e-lead collection that they offer.
