# A LETTER FROM OUR CEO

Dear Distributor,

Thank You for your business.

2020 began with hope and optimism for record sales but quickly turned into a reinvention to deal with the unique needs of the COVID pandemic.

As a primary manufacturer, we are able to quickly add production lines to make Essential PPE products at a time of shortages in the country, especially in the NY Metro area.

Within weeks we designed and built tooling to make Face Shields. Materials were sourced and tested. Production lines were setup. Products were approved for use and we scaled up to produce 150,000+ Face Shields weekly. We delivered millions of units at the time of greatest need and were able to remain in production continuously through the pandemic. Distributors requested more and we were able to add USA made Face Masks, Ear Relievers, Counter Shields, Cleaning Supplies and Hand Sanitizer Kits.

We also added **100% Post-Consumer Recycled** materials that meet FDA guidelines for food contact became available. We partnered with the recyclers and gained access to materials that would otherwise be available only to the major food packagers. Single-use containers are reclaimed from municipal recycling centers, sorted, shredded and sanitized to make food-safe rPET and rHDPE. We mold New Refillable & ReUsable Sports Bottles.

Since 1963 we have been a full service manufacturer with all processes under our control. More than 90% of our products are manufactured in our NY factory. We have continued to invest in production automation that makes our workers efficient and our products price-competitive.

As a signatory to the **PPAI Code of Conduct**, we are committed to product safety and social compliance. Material and product compliance documents are available at [garyline.com](http://garyline.com).

Product Data, Inventory, Order Status, Shipping Notification, Purchase Order and Invoice are available on **PromoStandards** to make it easier than ever for distributors to present ideas and to process, track and bill orders.

Every day we strive to earn your business. As a **5-Star / A+ Top 40 Supplier** we are focused on Customer Service and On-Time Delivery for our distributor partners and their clients.

We look forward to working with you in 2021.

Sincerely,

Gary Hellinger  
Chief Executive Officer  
Gary Plastic Packaging Corp.

# UPCYCLING™

To a Second Life!

## What Is Upcycling?

Diverting materials from the waste stream & recycling to create a product of higher quality & value than the original.

**Here's How It Works:**

Garyline® manufactures **NEW** Reusable Sports Bottles from **100% Post-Consumer Recycled Materials**.

The containers are sorted, shredded & sanitized to meet FDA compliance to make rPET & rHDPE material.

Single-use PET<sup>△</sup> drink bottles & HDPE<sup>△</sup> milk jugs are reclaimed from municipal recycling centers.

Single-Use containers are given a **Second Life** as Reusable Sports Bottles that can be continually refilled which will divert hundreds more disposable bottles from landfills.

Garyline® is the first to offer this **NEW 100%** recycled material to the promo market. Join us as we work toward an Eco-Responsible future!

## PRODUCT INFORMATION

**PRODUCT COLORS:** Product colors can vary slightly from one production run to the next. PMS numbers listed are not always an exact match. Color variations on imported items must be considered acceptable. Catalog photos and color swatches are approximate. If clarification of product is required, please request a FREE random sample from [samples@garyline.com](mailto:samples@garyline.com)

**SUBSTITUTIONS:** Due to necessary changes and product improvements, we reserve the right to substitute products of similar pricing, value and style for those shown in the catalog.

**PLASTIC ITEMS:** Due to the nature of plastics, scuffs and scratches can be seen on darker colored plastic items. This is unavoidable in the molding and printing process. These marks are not considered a defect and will not be eligible for credit.

**TOTE BAGS:** Colors can vary by dye-lot. Small variances in color are not considered defects. Stitching can also vary +/- 1/2" - all corners are not exactly square - we will align imprint to the top edge. Slight misalignment with the sides will be considered acceptable. Non-woven material has a textured surface that is visible through the imprint especially with heavy ink coverage and is considered acceptable.

**COTTON** Towels and bandanas are not 100% color fast – slight bleed over time is accepted. Stitching can also vary +/- 1/2" - all corners are not exactly square.

**BOTTLE & CUP CAPACITIES** are approximate liquid measure to the rim.

**BOTTLE & CUP WASHING INSTRUCTIONS** are listed on each product page. PETE sport bottles are not dishwasher safe - Hand Wash Only. Other bottles, cups and mugs are top-rack dishwasher-safe, but this does not include restaurant or commercial dishwashers. Imprinting on polypropylene cups and mugs is not permanent and will deteriorate over multiple washings or with abrasive cleaning.

**CLEAR & TRANSPARENT PRODUCTS** – imprints on clear and frost products appear lighter due to the background light. Second Side imprints are not recommended on clear products. Dark or black imprints on transparent red, green, violet and smoke have very little contrast and are not recommended.
