ROUGH SURFACE & HIGH TACK

Provides Greater Adhesion to Textured Surfaces on Storage Containers, Machinery, and Equipment.

NOTE: Yellow Vinyl with Rough Surface Adhesive is a brighter yellow than our standard yellow vinyl.

AGGRESSIVE ADHESIVE FOR TEXTURED SURFACES OR HIGHER TEMPERATURE APPLICATIONS

- Rough Surface Performs Well on Curved Surfaces
- High Tack Has Higher Temperature Tolerances

Material / Adhesive Choices

Rough Surface Adhesive: Performs well in cold temperature applications, is flexible and will conform to simple curved surfaces and is suitable for moderately rough or textured surfaces.

High Tack Adhesive Polyester: Can be applied to glass, metal, paint, or plastic flat surfaces. This material handles higher temperatures well.

1 Color with Square Corners

- #66211 White Vinyl (rough surface permanent adhesive)
- #66311 Yellow Vinyl (rough surface permanent adhesive)
- #66411 White Poly (high tack permanent adhesive)
- #66711 Chrome Poly (high tack permanent adhesive)
- #66811 Clear Poly (high tack permanent adhesive inside window)
- #66815 Clear Poly (high tack permanent adhesive back)

DESTRUCTIBLE & TAMPER-EVIDENT

Provides Additional Security to Equipment or Parking Permits.

Provides Protection for Manufacturer's Warranties.

PROTECTS AGAINST TAMPERING & THEFT

- Destructible Decals are Non-Transferable
- Tamper-Evident Decals Show "VOID" When Removed

Material

Destructible: Identify and label products and property with these non-transferable decals. If removal is attempted, the decal is destroyed.

Tamper-Evident: If removal of decal is attempted, it breaks a bond within the material and an outline of the word VOID remains on the surface.

PLASTIC NAMEPLATE

CLEAR TEXTURED PLASTIC DECALS

- Subsurface Screen Print Projects Imprint
- Mar-Resistant Plastic with Permanent Adhesive

Material / Adhesive Choices

Stable, clear plastic, well-suited for product and company identification nameplates. It is primarily intended for interior application and is frequently used on office equipment, appliances, computers, electronics and electrical equipment as well as ATM machines. The material is mar-resistant and features permanent adhesive. Subsurface screen printing means your message is protected from continual exposure to cleaning or other forms of daily wear.

Tip! - What Size Label Do I Need?

Use a flexible measuring tape to wrap around bottle. Or use a sheet of paper to wrap around bottle and mark where it overlaps with a pencil. With a ruler, measure the distance between the end of the paper and the mark to determine the label's length. Adjust artwork accordingly if label overlaps.

Ordering Information

1. AFL-CIO UNION LABEL

Available by request. Used on all political orders unless specified.

2. CALENDARS

Orders received before June 1st for items with stock calendars will receive current year calendar unless otherwise specified. Orders received on June 1st or after will receive the following year's calendar unless otherwise specified.

3. CANCELLATION CHARGE

\$54.00 (X) if an order is cancelled after artwork has been prepared. Once an order has been printed, it cannot be cancelled.

4. CATALOG ILLUSTRATIONS

Logos and other imprints shown in this catalog are for illustrative purposes only. They do not imply endorsement, nor are any items with these specific logos for sale to anyone other than parties expressly authorized by the owner of such designs.

5. CHILDREN'S PRODUCTS

As required by the Consumer Product Safety Improvement Act, certain products will be marked with tracking information including our company name. These items include the Holiday & Children's Sticker Sheets and #3302, 3303, and 3307 Lapel & Badge Stickers.

6. COLOR MATCH

If a Pantone® number is specified or a color sample matched add \$48.00 (E). No guarantee of perfect matches. Color match not available on black License Frames. Color Match available on Poly Bag Yard Signs add \$188.00 (E).

7. POLITICAL

State and federal laws vary with regard to notices which must be printed and identification of those responsible for purchasing, publishing, or distributing political advertising. Be sure your customer submits the correct copy to meet these requirements.

8. PRICING

Custom Decals

- Multiply length times width for total square inches.
- Count number of colors. White must be priced as a color on clear.
- Determine quantity.

Intermediate Quantities: To price quantities between the standard quantities shown, use the unit rate for the next lower quantity. For example, 200 units price at the 125 unit rate; 400 units price at the 250 rate, etc.

Contact Customer Service on quantities or sizes not shown.

9. REPEAT ORDERS

Identify repeat orders with the previous order number and the year it was produced. Orders are retained on file for three years. A sample will be needed for repeat orders more than three years old.

10. WHITE BACKUP ON CLEAR MATERIAL

When printed on clear material, we recommend backing the imprint with white for better readability. This can be done three ways: a halo around the image area (a small outline of white will show), slightly inside the image area (not available on small type or fine detail), or a white background. See sample page 205. Please submit your artwork with a white plate for this white backing.

White halo around image.

White slightly inside image (seen from back).

White background.

11. PRINTING

Printing Methods: Screen, flexography, digital, offset and thermal printing. Refer to www.gill-line.com for expanded printing information.

Four-Color Process: Four-color process is available on many catalog products. Screen Printing: Printed in 55-100 line screen. Offset and Flexo Printing: Printed in 150 line screen. Digital Printing: Variable resolution. Contact Customer Service for additional information or specifications, or if design is separated from original art. When printing on clear material, backing the imprint with white is recommended. White must be priced as a color.

12. PROOFS

Proof will be furnished upon request. **No Charge** for two proofs per order. Additional proofs \$20.00 (X) per proof. Proofs will be emailed unless otherwise requested. A complete email address must be provided. Email proof colors will vary based on your computer system or printer. Refer to page 201 or Pantone® chart for colors.

13. PRODUCTION TIME

Production time begins after receipt of complete order including art, in catalog quantities or after proof approval. Check with Customer Service about production time above catalog quantity. Changes made to an order in progress could result in a later ship date.

Expedited Service: An extra charge may be required to expedite an order to ship in less than normal production time. Contact Customer Service each time this service is needed to discuss customer requirements and our ability to meet them given current production conditions.

14. SAMPLES

Material samples are always available at no charge for testing. Because of the wide variety of uses of our materials, we would like to ensure that the right product or material is used for a particular application. Identifying how the product will be used or what the decal will be applied to will help determine what material is best suited for that application.

HOW TO CALCULATE SQUARE INCHES

DIE CUT ON DOTTED LINE

Maximum Length
X Maximum Width
 = Total Square Inches

8" x 7 1/2" = 60 square inches

Determine the total number of square inches then locate the appropriate square inch bracket on the desired custom page. Follow the pricing across to the quantity desired. Die charges are necessary when ordering irregular shapes. No charge for artwork.

15. SHIPPING

Mode of Shipment: Please specify. The F.O.B. point is our plant in Kansas. If no specific instructions are given these guidelines will be followed:

- Weight-based guidelines:
 - A)** 1 to 200 lbs. - United Parcel Service throughout the continental U.S., Alaska, Hawaii, Puerto Rico, and Canada. UPS Air Service or U.S. Postal Service is optional. Please specify.
 - B)** 200 lbs. and over - UPS Hundredweight Service or Truck.

- Shipping and handling charges will be added to all orders.
- \$10.00 (X) handling charge will be added to shipments requesting 3rd party freight billing.

Drop Shipments: For same day shipment to multiple destinations or by multiple shipping methods add \$8.00 (X) for each shipment after the first. \$52.00 (X) each for large corrugated signs and rigid material items over 24" x 48".

Delayed Shipments: For partial shipments on different days add \$29.00 (X) for each shipment after the first. All delayed shipment orders should be shipped within 6 months of receipt of order.

Packaging: Bulk except where noted.

Guidelines for Supplying Artwork

1. ART TEMPLATES

Art templates are available at www.gill-line.com. Templates illustrate correct bleed and margin size. The majority of custom items require 1/8" bleed past the cut line and 1/8" copy margin inside the cut line.

2. SOFTWARE FORMATS

PREFERRED

Adobe Illustrator

Export files as EPS or PDF.

ACCEPTED

Adobe InDesign

Export files as EPS or PDF.

Adobe Photoshop

Export files as PDF or PSD.

Note: Support files must contain: vector art, high resolution (300 dpi) images at finished imprint size for halftones and postscript fonts. PDF is the preferred file format that enables art files to process efficiently.

3. FONTS

Outlined fonts are preferred. If this is not possible, send fonts with files.

4. COMPRESSION

Stuffit® and WinZip®

5. VECTOR ART

Vector art is resolution independent, meaning it can be enlarged without reducing image quality. This is the preferred format for all artwork. All type should be converted to outlines to avoid potential font problems.

6. RASTER ART

Raster art is resolution dependent, meaning it cannot be enlarged without reducing the image quality. To ensure optimal print quality, TIFFs are used with spot color or full color artwork. Create at 300 dpi on the final print size. Art should be sent as CMYK for full color artwork.

7. VIRTUAL SAMPLES

Stock shape items have an easy-to-use virtual sample program within product pages at www.gill-line.com that lets you, or your customer, upload and edit artwork.

Each product is set up with its own specific imprint area and when a logo is uploaded to that product it will automatically be resized to properly fit in the area. In addition, a white background can be removed in one step, the logo can be colorized, and the text can be added and edited. Create perfect virtual samples every time!

8. ADDITIONAL INFORMATION

Visit www.gill-line.com to upload digital files, check for updated art guidelines, four-color process specifications, and other art details.

INK INFORMATION

Gill-line offers products printed by: screen printing, flexography, offset, or digital printing. We have chosen the most appropriate method for each product that is offered.

1. SCREEN PRINTING

Inks are ultraviolet (UV) light cured, pigmented colors. They are glossy and very resistant to chemicals and abrasion. All colors from page 201 with the exception of neon colors average 3 to 5 years outdoors. Neon colors will begin to fade in approximately 30 days if exposed to direct sunlight. Transparent inks, shown on sample page 205, average 2 years outdoors. They are typically used on substrates that allow the properties of the base material to show through the ink. Four-color process inks average 3 years outdoors. A clearcoat is available as an additional color. It can be used for extra chemical or abrasion resistance or to add a glossy appearance to four-color process inks. A clearcoat will not provide any additional protection from sunlight. Outdoor durability of most Pantone® colors will average 3 years with the exception of the fluorescent colors.

2. FLEXOGRAPHIC

Inks are water based for line colors and UV cured for four-color process. All formulations are made with lightfast pigments. Flexo items are typically printed on paper and are intended for indoor use only. Flexo labels that require scuff resistance or that will be used for product packaging such as shampoos, soaps, and oils need either a UV cured clearcoat or overlamination for protection.

3. OFFSET PRINTING

Inks are UV cured and strong in color to compensate for thinner ink film thickness applied. They create high quality images for four-color process printing and are outdoor durable for at least 12 months.

4. DIGITAL

UV inks are used in our digital presses. These inks are designed to adhere to a wide variety of flexible and rigid substrates as well as to be used indoors and outdoors. Accelerated weather tests have shown inks to be outdoor durable for the equivalent of approximately 24 months in a temperate climate. Ultimate durability will be determined by the substrate and/or use of the product.

MATERIAL INFORMATION

1. PRESSURE SENSITIVE VINYL

Vinyls are flexible, scuff resistant, plasticized films that will stretch and shrink slightly. They are for indoor or outdoor use.

2. PRESSURE SENSITIVE POLYESTERS

Polyesters are very “dimensionally stable” and will not stretch or shrink. Therefore, they do not conform well to irregular surfaces or compound curves. They are very resistant to chemicals. Polyesters are suited for indoor or outdoor use.

3. STATIC CLING VINYL

Cling vinyl is a highly plasticized vinyl film that does not require an adhesive to adhere to polished or smooth surfaces such as glass or mirrors. This material is recommended for indoor use only.

4. PAPER AND POSTER RELATED MATERIALS

Papers are used for a variety of products. Some recycled materials are available. Refer to specific catalog pages for more information. Plastic coated white poster board is suitable for short-term outdoor use.

5. MAGNETIC MATERIAL

Our magnets consist of a base magnetic material with a screen printed vinyl film or either a digital or offset printed face material. The base magnetic material has good holding power on most metal surfaces. All magnets are suitable for indoor or outdoor use.

6. REFLECTIVE MATERIAL

An enclosed lens, retroreflective film, this material is often used with transparent inks to allow the reflective properties of the substrate to show through the ink. This material is appropriate for indoor or outdoor use.

7. PLASTICS

Several plastics are used on our products. Some recycled and biodegradable materials are available. Corrugated plastic, 23, 35, and 55 point plastic and opaque polyethylene are the only plastics suited for outdoor use. These plastics are recyclable. Refer to specific catalog pages for more information.

8. FLEXP

Pressure sensitive papers and films include: white and yellow gloss papers, neon papers, gold and silver foil papers, and clear polystyrene. All of the flexo printed materials are intended for indoor use.

9. BANNER MATERIAL

Reinforced vinyl banner is intended for short-term outdoor use (6 months or less) or indoor use. This material is typically printed using our UV digital inks. Final product includes finished ends and grommets attached for easy hanging.

10. ADHESIVES & ADDITIONAL INFORMATION

Many of the Gill-line products have different adhesives. Some have permanent and others have removable, ultra removable, or repositionable adhesive. Each product has been designed to offer the best combination of material and adhesive. For instance, our Bumper Sticker vinyl has an ultra removable adhesive that insures clean and easy removability, even after one year from application. More adhesive information can be found at www.gill-line.com.

COLOR SWATCH

Pantone® colors listed above are a similar match to Gill colors. Color samples are printed on white stock. Actual appearance of Gill or Pantone® colors may vary on materials other than white.

NEON COLORS

Begin to fade in 30 days if exposed to prolonged sunlight. They are not recommended on clear or light colored backgrounds. A dark background is suggested for better readability.

COLOR MATCH

If a Pantone number is specified or a color sample matched add \$48.00 (E). No guarantee of perfect matches. No guarantee of a perfect match on four-color process products. Color match is not available on black License Frames. Color Match is available on Double-Sided Poly Bag Signs add \$188.00 (E).

REFLECTIVE MATERIAL

Special transparent inks are recommended. Choose from: Red, Blue, Orange, Green, Yellow, Purple, Magenta, Teal, and Gold. Refer to Sample Page 205.

YELLOW VINYL

Is a pigmented material and is not the same color as 10 or 12 yellow. Refer to Sample Page 203.

SPECIAL INKS

Flexographic, offset, digital, and sublimated items use different inks. Colors shown above are an approximate reference. Flexographic neon colors are noticeably lighter than the colors above. Neon and metallic inks are not available on offset, digital, sublimated, or thermal items.
