Item# 26120085

This rechargeable all LED Work Light has both a spotlight and a floodlight built in. The spotlight, located in the base of the handle, is rated at 32 lumens. It's perfect for putting a narrow beam of light into a specific area. The floodlight, rated at 230 lumens, is designed for lighting up a large area. The idea is simple: use the spotlight to find the problem and the floodlight to light up the area when fixing the problem. The work light has two magnets built in – one at the balance point in the middle of the handle and the other at the tip of the light. The integrated Nickel Metal Hydride battery can be recharged with the included AC or DC power supply/charger.
