ELEVATE YOUR CORPORATE GIFTS.

We offer laser engraving for applying your logo to our items. We are happy to discuss which method would best fit your project needs based on your time frame and logo design.

Laser Engraving

Laser Engraving is a quick process to mark the surface of the leather using a laser beam. The laser beam creates high heat which physically removes the surface of the material reflective of your logo to expose the cavity.

Please email your high-resolution logo to sales@sargeleatherco.com. We will size your logo to best fit the available decorating area based on the item and method of decoration. All projects are provided with a digital proof for approval prior to production.
