

DEM|MKV[®]
Group

WHO WE ARE...

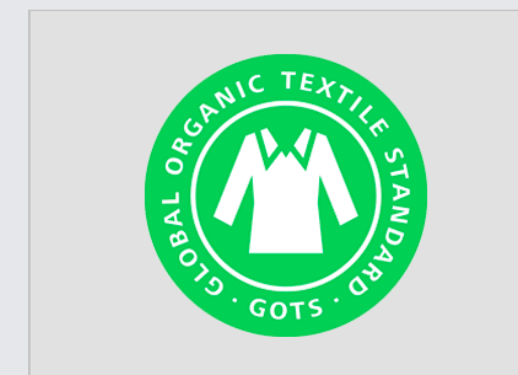

- Demka Textile was established in Turkey in 1988 as a global multi-product textile company.
- Research and development is valuable for Demka in technical textile and fashion areas, and we are committed to being a symbol of fashion, creativity, and innovation.
- Demka Textile strives to offer the best in fashion from Istanbul, London, and now Manhattan Design Offices with a strong design team.
- Market intelligence is key to our business besides fashion, fabric, and technology fairs and seasonal shopping and research trips.
- Using the Group's fabric mill and various suppliers, Demka's Fabric Sourcing Team offers the latest trends to international clients.
- Cost-effective solutions and flexible productions are achieved using variable production areas currently in Istanbul, Adiyaman and Addis Ababa.
- Demka's woven and jersey garments manufactured under strict quality requirements are shipped to leading brands in the world's fashion capitals. They have won the hearts of discerning women, men, and children with their high quality, fashion, and design.

- **Demka Group** operates worldwide via eight companies and **2,000,000 pieces monthly capacity**;
- **Istanbul / Head Office:** Main design office with design teams with over 160 employees in the planning & management teams.
- **Istanbul / Head Office – Sampling Facility:** There is a sampling team of over 50 staff in Istanbul premises. Over ten pattern cutters and their assistants use the Gerber pattern system with easy conversion of any other pattern system files for quick sampling. Our sampling unit has digital all-over & screen-printing machine for cottons and viscose, digital all-over & screen-printing machine with heat curing for polyesters, transfer print machines, 4 head sample embroidering machine, and collar knitting machines. With our sampling staff operating 40 stitching machines, we rapidly prepare your models, as we are fully motivated to give the best service to our customers.
- **Istanbul / Head Office – Testing Facility:** We carry tests in our in-house testing facility, with all accredited testing equipment. We can do the following tests: Color Fastness, Color Staining, Pilling (Martin Dale), Bursting Strength, Shrinkage, Rubbing, and color spectrophotometer.
- **Istanbul / Production Facility:** Operates with 160 employees (cutting, sewing, ironing & packing, and warehouse).
- **Adiyaman (Turkey) / Factory:** Currently operates with 15 production lines (eleven lines of “jersey” and four lines of “woven” productions) with 340 employees on a 12K sqm closed area. Our Adiyaman factory is 70% fully integrated (cutting, sewing, ironing & packing, washing, printing, embroidery, labeling productions, and a warehouse).
- **Demka Energy:** Demka Group's Adiyaman factory uses solar panels and generates all of its electrical energy needs from these panels. Demka Group also gives service of excessively developed electricity to the Turkish Government.
- **Ethiopia Factory:** Operates with six active lines since the beginning of 2021 with over 300 employees on a closed area of 33K sqm. By the end of 2022, our facility in Ethiopia will be increasing step by step to 60K daily capacity with 48 lines and 1800 workers with its print and embroidery operations in-house.

Demka Fabric Manufacturing & Dying – Fabric Mill / Adiyaman Manufacturing Plant :
By the end of the year 2023, Adiyaman – Turkey plant will become an utterly vertical facility. Currently, in the investment phase, it will be finished and activated by the end of 2022. Forty-three circular knitting machines with over 15 tons of fabric to be knit at the plant on 34.000sqm closed area. Additional material dying facility will be active by the end of 2023 with 10 tons of fabric dying daily capacity.
