### YOUR COLOR YOUR DESIGN

## Rotary Printing:

*Custom PMS Bandanna Colors, Faster Production & Softer Bandannas!*

Starting at 2,500 pieces, we use the rotary process to print your bandannas. Rotary printing creates a softer bandanna because the eco-friendly, water-based pigment dyes are absorbed into the cloth.

### Additional benefits:

- Your design is printed on white cloth so colors stay true
- Initial screens are included in pricing below
- Faster production for large orders
- We can print up to eight colors with these piece restrictions:
  - 2,500 - 1-2 colors
  - 5,000 - 1-5 colors
  - 10,000 - 1-8 colors
- Prepro sample at NO charge
- Edge-to-edge printing is possible, depending on design
- Two fabric choices -100% Cotton & 50/50 Poly Cotton

## DUPLEX PRINTING

Our USA Made Exclusive  
Print Process  
2-Sided Bandanna  
Imprinting

The fabric is printed on both sides in Duplex Printing. With this method a clear outline is produced on both sides of the fabric. The design is applied so skillfully by the printing cylinders that the result may be mistaken for a woven pattern.

### Additional benefits:

- Innovative Printing (two sides with pigment dyes)
- Custom PMS Bandanna Color
- Initial screens are included in the price
- Restrictions involved - ONLY a 1 or 2 color design will work and art must be reviewed by our art department to see if the design is "Duplex Printable"

# HOW WE PRINT: (4) - USA Processes

## YOUR PRINTING OPTIONS

We print bandannas four ways: silkscreen, rotary, duplex & digital. To determine how to print your bandannas, start by answering this **simple question**:

**HOW MANY?  
HOW MANY  
COLORS?**

**LEARN MORE**

We do have one more printing process to check out - **DUPLEX PRINTING**. See pg. 25 for details.

### SILKSCREEN

If your order is between 144 and 5,000 pieces, silkscreen is your least expensive option.

Silkscreen is a one-sided imprint on cloth that has been dyed a color and cut and sewn into bandannas. Because the cloth has been dyed, it is the same color front and back.

Same color front and back.

### ROTARY

Rotary printing starts with white cloth. Your design is printed on one side of the bandanna, with colors being pushed through to the back. This creates a "snowy" look on the back, which is more noticeable on a dark background than on a light background.

Dye push through back side of bandanna penetration... more noticeable on dark colors than light.

### DIGITAL

Digital textile printing is a new and innovative process that involves printing an image directly from the computer onto the desired media by way of a large format inkjet printer.

Depending on the design of the bandanna, digital printing allows printing off the edge. Digital printing also allows low minimums.

With digital printing, you don't have to worry about how many colors you want to print or any screen charges or set up fees.

The art provided needs to be of high quality (300 dpi or vector-Ai). PDF's, JPEG's, EPS's or TIFF's accepted.

## SILKSCREEN

Like all silkscreen imprints, the ink sits on top of the fabric and can be felt when you rub your hand over it.

Silkscreen printing does not allow for edge-to-edge printing. All designs must have a border. When starting with a blank 22" bandanna, the imprint size is 18" x 18". We offer many pre-printed designs to which you can add your imprint. These designs offer open center, overprint or edge print options.

In silkscreen printing, the imprint color is laid down on top of a dyed piece of cloth. The color of the cloth can change the color of the imprint. For example, a red imprint on blue cloth could lose some of its "redness". Bandannas, unlike T-shirts, **cannot** be printed with a white base coat first. If matching a PMS color is critical, it's best to use a white or natural bandana.

Multi-color imprints are available starting at 144 pieces. A screen is needed for each color. We can print up to six spot colors.

### THE FEEL

### PRINTING COLORS

### MULTI-COLOR IMPRINTS

### PROCESS PRINTING

## ROTARY

With rotary printing the ink is absorbed into the cloth and cannot be felt when you rub your hand over it. As a result, you get a softer feeling bandanna.

Edge-to-edge printing is possible with rotary printing, but only certain layouts will work. Our production department must approve your design. Our staff can also recommend changes that will allow your design to be printed edge-to-edge. If your design cannot be printed edge-to-edge, the imprint size is the same as on a silkscreen order.

Rotary printing starts with white cloth. Each color in your design is printed directly on white cloth - making colors vibrant and true. PMS colors can be easily matched.

We can print up to 8 spot colors, please see restrictions on page 24.

While we cannot print process color designs with rotary, we can get a similar look. This requires printing your design in 5 to 8 colors. Our art department can help you determine the number of colors required based upon your design.

## IMPRINTS -- Silkscreen

PMS color imprints: Unless requested, exact color matching is not guaranteed. Colors will be matched as close as possible. A PMS color is guaranteed on white/natural bandanna only.

## ROTARY
