How it Works

Step 1

Choose Your Packaging

The Smart Box chip can be inserted into any of our Classic Boxes, Corrugated Boxes or Pillow Pods. The choice is up to you!

Step 2

Choose Your Digital Experiences

Our Smart Box chip allows the user to engage with multiple digital experiences. On the first tap, show them an informational video, on the second tap entice them with an offer, and on the third tap send them to a customized landing page to collect user data. The type and number of experiences is up to you! Simply send us your content and we'll take care of the rest.

Step 3

Tap Box With Your Phone

Once the experiences have been programmed onto the chip and inserted into the box, it's ready to go! Simply tap the box with any smartphone*.

Step 4

Reveal Digital Experience

With a single tap reveal the digital experience, and keep them tapping for more!

*NFC technology works with all Android and iPhone 10, and newer devices.
